CREATORS SHOW & TELL

Questions?
Contact Jana Lindley: lindleyj@usd320.com or 785-456-2214 x5204

Your project is to make a creation with your 3D pen and then show & tell about it at our event at Iron Clad.
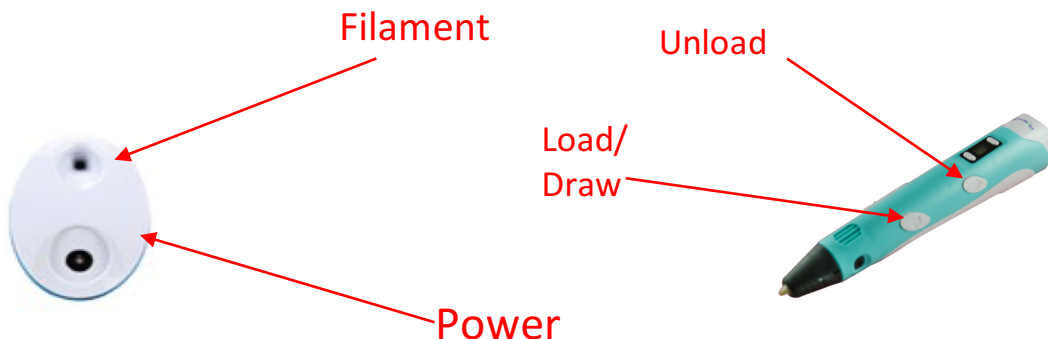

3D Pen Instructions

Need to purchase additional 3-D pen filament?
Order it on Amazon or contact Dr. Allen Sylvester: sylvestera@usd320.com

YouTube video link about the product: https://youtu.be/QuvVC41sims

Read the enclosed instruction manual carefully before operating this 3D pen!

1. Plug the power adapter into the outlet and then into the power input hole at the top of the pen.
2. There will be a YELLOW light that will show you that the pen is on, and then a RED light that means the pen is heating up. When the RED light turns BLUE it is ready for the filament.
3. Put the filament (the filament setting on the LED will ask ABS or PLA-- Select PLA) in the other hole on the top of the pen; then press the button with the arrow facing the tip if the pen twice to load.
4. To draw, press the same button you used to load it and hold it down. For a continuous flow press the button twice. To stop the flow, press the button once. To change speed, use the slider on the other side of the two arrow buttons.
5. To unload, press the button with the arrow pointing to the top of the pen twice. When reloading the filament, cut the end of the filament flat.

THANK YOU TO OUR SPONSORS!
